A Leader in Pharmaceutical Packaging

Colbert Packaging has been working with pharmaceutical and healthcare companies for more than five decades and maintains strict manufacturing procedures. As a cGMP compliant manufacturer, Colbert Packaging's commitment to quality is reflected in each step of the production process, with extraordinary attention to detail evident throughout every operation. The manufacturing process is lean, and our custom-built facility was specifically designed for efficient, direct, one-way movement through production. Colbert Packaging has been publicly recognized by its pharmaceutical clients for meeting the highest manufacturing and customer service standards.

Colbert's approach to pharmaceutical packaging includes:

- Documented procedures and statistical process control
- Pre-performance carton testing for critical production run attributes
- Experienced quality auditors on all shifts
- Training and involvement of every individual in quality management goals
- Inline application of covert security sensors
- Backside consecutive numbering of roll labels

A Diverse Packaging Portfolio

Colbert Packaging is continually developing innovative products to meet the meticulous requirements of the pharmaceutical industry. Our diverse packaging portfolio includes products such as Zip-Sert® and ComplyPak™ that were specifically developed for pharmaceutical companies.

Folding Cartons. Many packaging companies produce folding cartons, but Colbert Packaging delivers folding cartons with a high level of service unmatched in the industry. Colbert offers all of the most popular and many unique folding carton styles - all fully customized.

Pressure-Sensitive Roll Labels. Colbert Packaging designs and prints pressure-sensitive roll labels containing brand identity and product information. Labels are available in a variety of shapes and sizes, and with quick turnaround times, products get to market faster.

Security Solutions. As a certified supplier of RF-EAS Source Tagging Sensors, Colbert Packaging can automatically apply sensors during the packaging operation to increase asset protection - without the traditional labor costs associated with manual tagging. Various security ink solutions that provide instant authentication when exposed to verification technologies are also available.

Compliance Solutions. Colbert Packaging offers a complete line of unit dose packages to promote patient compliance. The unique combination packages can be enhanced and protected with the power of PharmaGuard™ - a tear, bite and moisture resistant solution designed to help pharmaceutical manufacturers achieve their F-rating goals. By integrating PharmaGuard into AlertPak™, ComplyPak and other patient compliance packages, prescription medications can be safeguarded against child tampering, while ensuring environmental sustainability.
