

PharmaGuard

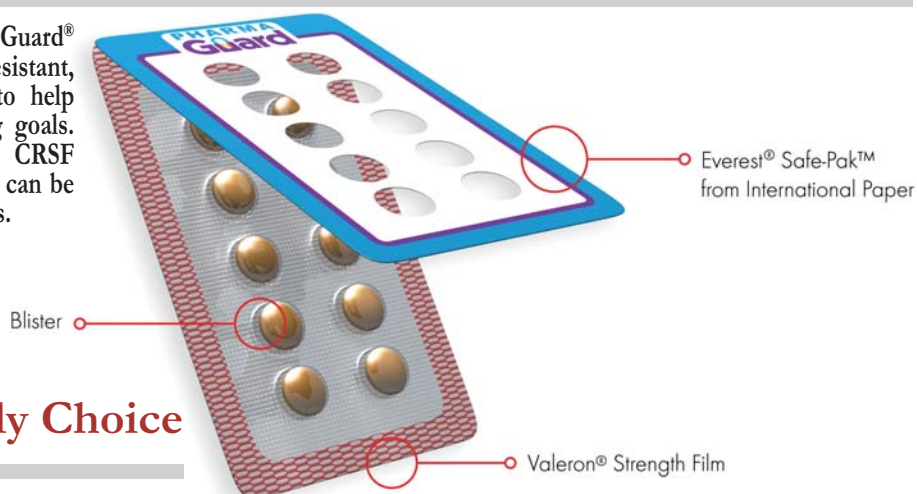

PharmaGuard ... Executive Summary

- Based on the Award-Winning, Patented BlisterGuard Package
- Provides Enhanced Security to Compliance Packages
- Tear, Bite and Moisture Resistant
- Complies with Retailers' Sustainability Requirements
- Fully Brandable and Customizable

Sustainable, Tear-Resistant Solution for Pharmaceuticals

Based on Colbert's award-winning, patented BlisterGuard® security package, PharmaGuard™ is a tear-resistant, bite-resistant, moisture-resistant solution designed to help pharmaceutical manufacturers achieve their F rating goals. Offering enhanced packaging security that meets CRSF requirements, PharmaGuard is fully customizable and can be incorporated into most compliance packaging solutions.

An Environmentally Friendly Choice

The innovative PharmaGuard package combines Everest® Safe-Pak™ heat-sealable paperboard from International Paper with multilayer Valéron® Strength Film. Everest Safe-Pak, the raw material used in PharmaGuard, is solid bleached sulfate paperboard, which is derived from a renewable resource – trees. PharmaGuard is also recyclable in programs that accept mixed material packaging, meeting demands for more sustainable packaging.

Protect Patient Compliance Packages with PharmaGuard

Colbert Packaging offers a complete line of unit dose packages to promote patient compliance. These unique combination packages can be enhanced and protected with the power of PharmaGuard. By integrating the PharmaGuard solution into AlertPak™, ComplyPak™ and other patient compliance packages, prescription medications can be safeguarded against child tampering, while retaining the benefits of environmental sustainability.

** PharmaGuard may be recycled in programs that accept mixed material packaging.*
